Summary

Full Stack Engineer with 2+ years delivering scalable enterprise products using **React.js, Node.js, and Flutter**. Results-oriented developer specializing in **Multi-tenant ERP** and **White-label SaaS** architecture. Strong expertise in **TypeScript, RESTful APIs, MySQL, and CI/CD**. Proven end-to-end ownership, performance optimization, and successful delivery of production-ready web and cross-platform mobile applications.

Experience

Software Engineer — Oct 2023 – Present
Tarka Infotech Pvt. Ltd. (Tarkasoft) — *Bengaluru, India*

Flutter Mobile Applications — Android & iOS

- Architected and shipped **2–3 cross-platform Flutter apps** (Material Design 3 UI) for enterprise clients — now **live on Google Play Store** with active user bases. *[Add your Play Store URL here]*
- Owned the full app lifecycle: UI design, development, Play Store submission, release management, and **continuous production support**, maintaining zero critical incidents post-launch.
- Delivered pixel-perfect responsive interfaces using Flutter's latest widget ecosystem, replacing legacy apps and **significantly improving client satisfaction**.

React.js ERP Web Application — Client-Facing Product

- Built a **client-facing ERP web app from scratch** using React.js with modular component architecture — **accelerating feature delivery by 25%** across a 3+ developer team.
- Integrated RESTful APIs across core ERP modules (inventory, billing, reporting), **boosting user engagement by 15%** and eliminating manual data-entry bottlenecks.

Legacy ERP UI Modernisation — 3+ Enterprise Client Migrations

- Led **UI/UX overhaul across 3+ client deployments**, migrating outdated interfaces to modern responsive designs while preserving backend logic — reducing migration risk and cutting per-client delivery time.

Greenfield ERP Platform — White-Label SaaS

- Engineered a **white-label, multi-tenant ERP platform** from the ground up (Bootstrap 5, CSS3, jQuery, JavaScript, PHP, PostgreSQL) deployed across multiple enterprise clients with distinct branding requirements.
- Designed a **multi-tenant theming & layout engine** — switchable colour themes, sidebar modes (collapsed / expanded / icon-only), header variants, and dynamic menus — enabling **zero-code-change white-label deployments per client**.
- Built a reusable UI component library (dashboards, data grids, forms), **cutting per-client customisation effort by 30%** and delivering **20% faster load times** across data-intensive ERP workflows.

Projects

Full-Stack E-Commerce Platform

- React.js, Redux Toolkit, Tailwind CSS, Node.js, MongoDB — product catalogs, cart, JWT auth, and secure checkout with scalable global state management.

Real-Time Facial Emotion Recognition System — Python, OpenCV, TensorFlow, Flask

- Computer vision pipeline achieving **85% recognition accuracy**; Flask web app for real-time classroom engagement analytics and reporting.

Smart IoT Car Parking System — Arduino, C++, Ultrasonic Sensors, LCD

- Sensor-driven IoT system that **reduced lot congestion by 30%** with real-time LCD availability display.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, Dart, PHP, Python
Frontend	React.js, Redux / Redux Toolkit, HTML5, CSS3, Sass, Tailwind CSS, Bootstrap 5, jQuery
Mobile	Flutter, Dart, Cross-Platform Dev (Android & iOS), Play Store Deployment & Release Management
Backend	Node.js, PHP, RESTful APIs, MySQL, PostgreSQL, MongoDB
Architecture	Multi-Tenant Systems, White-Label SaaS, Component Libraries, Design Systems, Figma, Adobe XD
Testing & Tools	Jest, Unit & Integration Testing, Git, GitHub, GitLab, Webpack, Postman, VS Code, CI/CD
Practices	Agile / Scrum, Performance Optimisation, End-to-End Ownership, ERP & SaaS Delivery

Certifications

Process Automation Systems Using Python — *Aqmenz Automation Pvt. Ltd.* — 2022

Education

Bachelor of Engineering (B.E.), Mechatronics — CGPA: 7.0 / 10 — 2019 – 2023
Sri Venkateshwara College of Engineering — *Bengaluru, India*
